The Buddy system was established at the Faculty of Medicine in Foča much earlier, but it did not satisfy continuity and sustainability. The initially established system was not a voluntary type, but a paid job for students based on the number of services provided to foreign students by domestic students.

As part of the BIOSINT project, the faculty management decided to announce a competition for new buddies, to educate them and to connect them with students who need the help of a mentor for faster integration into the faculty, society and environment.

First of all, a sub-register Buddy program was created on the faculty website, within which all relevant information necessary for performing the role of a buddy can be found.

The primary goal is to help newcomers to the faculty (new students) who want the help of a student mentor on a voluntary basis.

The faculty decided to have a constantly open public call for all its students (domestic and foreign) who want to participate in the buddy program (Join the Buddy program).

There is a brochure on the website <http://mef.ues.rs.ba/> - Studies in English – International cooperation, that is useful to read in order to gain basic knowledge about the role of a student mentor.

In addition to the brochure on the website, there is a List of needs buddies, as well as the names of buddies and buddy matching.
